*10 Tips On How To
Nail The Job!*

Step 1

Know Your Audience

Most interviewers like to ask "Tell us what you know about our company"

It's good to do research before going on an interview. The more you know about your potential employer, the better.

Research, take notes and you'll be prepared.

Step 2

"YOU CAN HAVE
ANYTHING YOU
WANT IF YOU
DRESS FOR IT"

Dress To Impress

You don't get a second chance to make a great first impression.

No matter what job the interview is for, it's always best to wear something clean and professional.

A button down shirt and slacks is the best way to go.

Step 3

BE EARLY!

Step 4

TURN OFF
YOUR PHONE

I gotta dig bick.

you that read wrong.

that awkward when you read that wrong too.

And said "moment" after awkward.

This is awkward.

This isn't a step but LAUGH a little,

You got this!

Step 5

Expect the unexpected

Don't have the mindset of "They probably won't ask me that", because they just might. Interviewers might ask you questions to throw you off and see how well you handle it. Stay cool and give your best answer.

Step 6

Stay On Topic

If your interviewer asks you a question, try not to give a long answer, but not too short either. It's good to just be brief and to the point. That way you won't start going off topic and saying things that will prevent you from getting the job.

Step 7

Bring Your Resume

Don't forget to have a copy of your resume with you. That is the first thing most interviewers want to see. Even if you already sent a copy when applying for the job, having a hard copy shows that you came prepared.

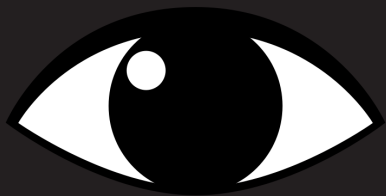

**Try to say the letter
'M' without your lips
touching.**

Step 10

Ask Questions

When it comes to getting interviewed, you might think you will be getting asked all the questions, not true. Interviewers like to ask if you have any questions for them. It shows that you are interested if you say yes and ask them questions. Prepare a few questions to ask before your interview so that you won't get stuck.
